

From Verified Origin to Global Standard

2005

Origin & Verification

System designed, built, and verified through seismic testing in Japan.

2026

Renewed Development

Technical documentation, market positioning, and outreach to research and investment partners.

Next

Digital Outreach

Building awareness for AZRAS through LinkedIn, X, Facebook, and other channels.

Next

Project Development in Priority Regions

Advancing concrete project development in partnership with the regions and organizations showing the strongest interest — Saudi Arabia, the UAE, the U.S., ASEAN, and Japanese contractors active in these markets.

Next

Collaboration with Building Component Manufacturers

Partnering with manufacturers who share AZRAS's vision on floor-to-wall interfaces, insulation, HVAC, and prefabrication of the infill and outfill layers.

Goal

Global Standard

Establish AZRAS as the global standard for “architecture that is not demolished,” and create a new benchmark for long-life infrastructure and asset design.
